

DVPT Program Report Webinar 07/27/23

Q&A

1. Where will this report be available?

- a. These program reports are in Intelligrants. They are available the first day of the month they are due, and they are due on the 20th day unless it is the last report of the grant cycle then they are due on the 30th day.

2. Who is best to contact with questions?

- a. You're grant manager will be the best contact but anyone at ICJI Victim Services will be happy to help.

3. Are the shelter services numbers (including demographics) the total number served by the agency or just DVPT funded?

- a. This question is asking for the total number served by the agency.

4. Are the crisis call and community education numbers DVPT funded or total number served by your agency?

- a. This question is asking you for the total number served by your agency.

5. Do we report on both DVPT and FVPSA program reports?

- a. If you are an agency who receives DVPT and FVPSA grants, you should only report the all agency data on the DVPT report. Therefore, on the FVPSA report, you will only report on the questions that are asking you for FVPSA numbers only.

6. Is it possible to break out unknown and other in the Race Ethnicity question?

- a. No, these charts are based on how we report on the federal reports and we need to stick to those demographics.

- 7. Do we also include VOCA DV victims in the DVPT report?**
- a. Yes, these would be reported in the sections where it asks for total Domestic Violence clients served by your agency.
- 8. How does it affect our FVPSA objectives and outcomes if we are reporting zero?**
- a. This will not affect those because you will still be reporting numbers on the questions that specifically ask for FVPSA data. The only questions you will be entering zeros on are the ones that ask you for data no matter the funding source.
- 9. When you say report victims only once per grant, since DVPT is a two-year grant that starts in July and FVPSA is a one-year grant that starts in October, so what is the time frame to report non-duplicated clients? Also, since FVPSA does not end until October with our current grant, do we start putting zero in now or wait until the new grant begins for FVPSA in Oct.**
- a. Starting with the DVPT 2023 Program Report 1 is when it will start so you will report zero in the FVPSA 2022 Program Report number 4 (quarterly) or 10 (monthly).
- 10. Our FVPSA funds primary prevention activities only so if community education (which includes school programs) numbers are reported on DVPT, do we not report any of the community education/prevention programs on FVPSA?**
- a. You only report community education regarding Domestic Violence on the DVPT report and this should include all community education completed by your agency.
- 11. What if your FVPSA grant serves a different population. Let alone the objectives and outcomes are entirely different. Is that taking away from FVPSA numbers and the number you said you will serve in that grant if you now have to count them in DVPT?**
- a. No, you should be reporting FVPSA specific data on FVPSA reports. Even though that program is serving a different population we are focusing on collecting total Domestic Violence data.

12. Just to confirm so no numbers are reported on that page 2 of the FVPSA report, we only complete narrative on objectives/outcomes? If so, is it possibly that page just be removed from Intelligrants?

- a. No, there will still be FVPSA specific questions on the report that you must fill out. On page 2 where it is asking you to report all DV data, you will enter zero on those questions because they will be reported in DVPT. Plus, there are some agencies that do not receive DVPT and will need to still report all data on the FVPSA so we are sure we are collecting everyone's data.

13. Will SA grants likewise have combined demographics in the future?

- a. There is currently no plan to combined these.

14. When it asks for "all funding sources", is that specific to ICJI or would that include grants outside of ICJI?

- a. This includes all funding sources including grants outside of ICJI.

15. Are the "other demographics" required? (Language services, LGBTQ and Youth Dating Violence)

- a. Yes, these are required demographics by the FVPSA program and we have to report federally on these.

16. Is the "other demographics" question specific to DVPT or will it be for all DV clients?

- a. This question is asking for all DV clients no matter the funding source.

17. How will the data be tracked for the new race/ethnicity categories? Will it be in percentages? For example, 50% white, 50% black for example – for one person or would one person be counted as 2 (one white/one black)?

- a. This question specifically one person would be counted as two races. This number does not have to match the total of individuals served.

18. It seems as though this is really now a report about everything our agency did for the month (all demographics, hotlines, other demographics, services, community education and surveys) right?? Very little is DVPT specific (5 questions) even though DVPT is just a fraction of our funding? If this is the case then anything that we report specific to FVPSA on the FVPSA report would be included in DVPT report too now, correct?

- a. That is correct, we want to collect all domestic violence data in one report and that is our end goal. That is why the new DVPT report only has a few specific DVPT questions and the rest are related to overall domestic violence.

19. For the first month, is “new” only people who are only truly new to our agency or would it be everyone in services since this is the first report?

- a. This would be everyone in services for this first report since it is a new grant cycle.

20. Is the template on the website exactly as the report will be? We do not need to report number of services anymore?

- a. The DVPT template that is on our website is the new format for DVPT. Our end goal is when the new FVPSA cycle starts, there will be a new FVPSA template that looks similar to the DVPT one and will ask those specific FVPSA questions.

21. For the LGBTQ demographics, is this going to ask how many DV Survivors we served that identify as LGBTQ? Or will it be broken down into its individual components? For example – How many people identifying as lesbian? How many people identifying as gay? How many identifying as transgender? Etc?

- a. It will not be further broken down. Please enter the # of individuals self-identifying in any of these categories.

22. For youth 13-17 with dating violence – Is this asking about youth that are currently 13-17 that have experienced dating violence? Or is this any client that had a history of dating violence as a minor teenager?

- a. Enter the # of NEW youth 13-17 that are currently experiencing dating violence and receiving services for dating violence for the reporting period.

23. Crisis calls – Is this asking about current clients that call experiencing a crisis? Or is this calls from potential clients experiencing crises? Or both?

- a. Based on the description in the report you would enter any call that comes into your agency that relates to an individual or family in need of some kind of service. It does not matter if they are already a current client. If they are calling with a crisis need you would count that call. So, yes, it would be both.
